2002 Pre Conference Symposium –Peri-orbital Esthetics, American Society of Maxillofacial Surgeons. Los Angeles California

20. Research Focus

My research activities have involved investigating the events occurring during bone healing and replacement of bone using hydroxyapatite. I have also looked at the use of finite element analysis in assessing outcome of surgical repair for congenital and traumatic facial deformities.

Currently my research activities include mandibular fracture repair and outcome of temporomandibular joint surgery.
